Declaration of Conformity

Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

This Declaration of Conformity covers the foam materials supplied by Palziv in relation to the material-related requirements applicable from 12 August 2026 under Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

Material Compliance

Palziv confirms that the supplied foam materials:

- Are not formulated with perfluoroalkyl and polyfluoroalkyl substances (PFAS).
- Do not contain Lead (Pb), Cadmium (Cd), Mercury (Hg) or Hexavalent Chromium (Cr(VI)) added during the manufacturing process.

Palziv recovers most of its manufacturing scrap, including suitable scrap returned by customers, and converts it into 3RFoam®, which is used in shock pads.

Future PPWR Requirements

Palziv continues to prepare for future PPWR requirements in accordance with the implementation timetable established by the Regulation.

- **PalBead®** Expanded Polypropylene and Expanded Polyethylene (EPP & EPE): Manufactured using expanded bead technology, with 30% PCR content, and fully recyclable. We expect to achieve 35% PCR content in advance of the applicable PPWR requirement.
- **PalFoam® / GalFoam®** (Chemically Crosslinked XLPE): Recyclability assessments are currently being conducted using recognized assessment methodologies. Additional information will be shared as it becomes available.
