SAFETY DATA SHEET

According to Regulation (EC) No 1907/2006 (REACH) and Regulation (EC) No 1272/2008 (CLP)

1. Identification of the substance

Trade names: Galfoam™, Palfoam™, Fusion™, Vizion™, Gal-OC™

Company Headquarters:
Palziv Ein Hanatziv Agricultural Cooperative Society Ltd. Ein Hanatziv, 1080500 Israel.
Telephone: +972 4 606 2999

Subsidiaries:

Palziv North America 966 NC 56 Hwy, Louisburg, NC 27549 United States of America
Telephone: +1 919-497-0010

Tropal DN 59 KM 8+550 M, Stanga, Timisoara, 307221, Romania.
Telephone: +40 356-807805

Palziv Mexico Parque Industrial Pueblo Viejo, Carretera San Luis Potosí – Zacatecas Km. 12.5, C.P. 78480 San Luis, S.L.P., México
Telephone: +52 444 258 9100

Website: www.palziv.com
Email: contact@palziv.com

2. Hazards identification

Classification of the substance or mixture: Not classified as hazardous according to Regulation (EC) No 1272/2008.

3. Composition/information on ingredients

Palziv products without FR do not contain any substances listed on the ECHA Candidate List of Substances of Very High Concern (SVHC) at concentrations exceeding 0.1% (w/w).

Regarding Azodicarbonamide : ADCA

ADCA (CAS 123-77-3) has been listed as an SVHC since 2012. Currently, no standardized or validated analytical method exists for testing ADCA concentrations in foams. To the best of our knowledge, As a chemical blowing agent, it decomposes almost entirely (>99.9%) during processing. Our foaming operations

consistently exceed the decomposition temperature of ADCA, and therefore residual levels in the finished product are expected to remain below 0.1% (w/w). Any remaining trace quantities are fully embedded within the polymer matrix and are not expected to be released under foreseeable conditions of use.

4. First aid measures

Description of first aid measures: To the best of our knowledge, exposure to our products, and under standard working conditions, should not have any health effects. In case of Physically response please seek medical advice.

Inhalation: Move to fresh air if dust is inhaled.

Skin contact: Wash with soap and water if irritation occurs.

Eye contact: Rinse cautiously with water for several minutes.

Ingestion: Not expected to be hazardous.

5. Firefighting measures

Suitable extinguishing agents: CO_2, water spray, foam, dry chemical powder.

Specific hazards: During combustion, the material may drip molten plastic fragments. The product may also decompose and release harmful gases. Combustion may generate dense smoke and hazardous decomposition products such as carbon monoxide (CO), carbon dioxide (CO_2), hydrocarbons, nitrogen monoxide, nitrogen dioxide

Protective equipment: Do not approach the fire area unless equipped with full protective gear, including heat-resistant clothing and a self-contained breathing apparatus (SCBA). Maintain a safe distance due to the potential for dripping molten material and the release of flammable gases.

6. Accidental release measures

Personal precautions: None required.

Environmental precautions: No specific measures required.

Methods for cleaning up: No special disposal required.

7. Handling and storage

Precautions for safe handling: Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). DO NOT handle, store or open near an open flame, sources of heat or sources of ignition.

Conditions for safe storage: Protect material from direct sunlight, avoid UV radiation. During transportation and storage, small amounts of the gas used as a foam blowing agent may be released; therefore, it is recommended to store the product in a well-ventilated area

8. Exposure controls/personal protection

General protective: To the best of our knowledge, exposure to our products, and under standard working conditions, should not have any health effects. In all cases of doubt, or if symptoms persist, seek medical attention.

Breathing Equipment: None

Protection of Hands: None

Eye protection: If dust is generated during processing recommend protective glasses with side protection are recommended.

9. Physical and chemical properties

Physical state: Solid foam, blocks and rolls

Density: 25–200 kg/m³

Ignition temperature: > 300 °C (Literature)

Water solubility: Insoluble

Explosive properties: Not explosive

10. Stability and reactivity

The product is stable and is not expected to decompose under normal handling and storage conditions.

Hazardous decomposition Products: Carbon monoxide (CO), carbon dioxide (CO_2), hydrocarbons, nitrogen monoxide, nitrogen dioxide.

Conditions to avoid: Follow suggestions in section 7.

11. Toxicological information

General Information: When used and handled according to specifications previously mentioned, the product does not have any harmful effects.

Acute toxicity: Not classified.

Primary Irritant effect on the eyes, skin and inhalation: Dust may cause irritation to the eyes, skin and respiratory tract. Decomposition products may cause headache and/ or irritation to the respiratory tract.

12. Ecological information

Ecotoxicity: No information existing about environmental hazard of the material.

Mobility: No data available on the product.

Biodegrading: This product is not biodegradable.

13. Disposal Information

Waste treatment methods: Product is recyclable. Dispose in accordance with applicable state and local laws and regulations.

14. Transport information

According to national and international guidelines, this product is classified as not hazardous and does not require a hazard warning label.

15. Regulatory information

The material does not pose an immediate chemical hazard that requires strict regulatory classification, with the possible exceptions of dust hazards during cutting or combustion hazards at very high temperatures (which are covered Sections 2 and 5 of the SDS, respectively)

16. Other information

Revision date: December 2025 ,Version 5

Issued in accordance with: Reach Regulation (EC) No 1907/2006, and CLP regulation No 1272/2008.

Disclaimer: The information supplied has been based upon our best knowledge, for the purpose of specifying the requirements regarding environment, health and safety in conjunction with the product. The information specified herein is accurate and reliable as of the date of publication. This safety data sheet is not to be interpreted as a warranty for specific product characteristics. Palziv takes no responsibility for inappropriate use, processing and handling by purchasers and users of the product.
